**Dear Sir or Madam,**

We are pleased to present you the latest edition of our Export Products Catalog . This is a special moment for us as we have the opportunity to showcase a wide range of innovative solutions that have emerged from the continuous development of our company. We believe that our offer will not only meet but also exceed your expectations.

We are proud to announce that in 2025, we will begin production of our products in a new, expanded manufacturing facility. This represents a significant step forward in our history. The new investment will increase our production capacity, enabling us to enrich the range of products available under various brands. Thanks to these changes we are prepared better to meet the rapidly growing market demands. Our workforce is expanding, and with it, the company's turnover has exceeded 80,000,000 EURO.

However, the growth of our company is not only quantitative but also qualitative. We are deeply committed to adhering to the highest environmental and quality standards, as evidenced by our attainment of ISO 9001 and ISO 14001 certifications. These accolades are a testament to our dedication to environmental protection and care for future generations.

Our research and development efforts, conducted by a team of nine highly qualified experts, focus on creating innovative and environmentally friendly products. We are addressing global environmental challenges by offering products that combine high efficiency with responsibility for the natural environment.

We understand the importance of supporting our business partners, which is why we offer a wide range of marketing services aimed at achieving mutual success. We view our collaboration with you as a strong partnership based on mutual trust and shared values, allowing us to grow together and achieve even better results.

We warmly invite you to continue our collaboration and to follow our progress. Together, by caring for the future of our planet and the development of our business partners, we strive to become a leader in our industry and open new opportunities on the path to shared success.

**Jarostaw Nowakowski**  
General Manager of the Amtra Group

**MOJE AUTO - LATEST CLEANING PRODUCTS**

Discover our latest cleaning products! **Magic Gel** from **Moje Auto** is perfect for cleaning various surfaces, from dashboards to keyboards and phones. It removes dirt without leaving any traces and is safe for delicate materials. **AC Doktor foam** effectively neutralizes odors in air conditioning, refreshing the ventilation system. **The X-NEON wheel and tire cleaner** is easy to use, quickly cleans dirt and brake dust, leaving your wheels shining. All products are environmentally friendly and ensure efficiency with every use.

For more information, see pages 17, 20 and 22.

**MOJE AUTO DETAILER - COSMETICS AND ACCESSORIES FOR THE DEMANDING**

We present the expanded line of **Moje Auto DETAILER** products, including specialized microfiber cloths for various applications in car detailing. The range also includes **Moje Auto DETAILER X-NEON PRO - a wheel and tire cleaner** available in 750 ml and 5 l packages. These acid-free agents effectively remove dirt and brake dust, are safe for different types of wheels, and contain corrosion inhibitors. Perfect for quick wheel washing, with the possibility of application using a foam sprayer.

For more information, see pages 27, 29 and 30.

**TECMAXX - BRAND NEWS**

**Tecmaxx** presents a new line of products for maintenance, lubrication, and repair, responding to the growing needs of customers. The range includes: **Active Foam** (1 kg and 5 kg) - effectively removes dirt from various surfaces, ideal for professionals and hobbyists. **Rust Remover** (400 ml and 500 ml) - effectively removes rust and prevents its return, making it easier to loosen seized bolts. **Ceramic Grease** - in spray and tube, protects and lubricates machines, providing long-lasting protection against wear and corrosion. **Epoxy Adhesive** - quickly bonds metal parts, easy to apply with a syringe. **Compressor Oil** - ensures efficiency and long life of compressors. **Brake Cleaner** - cleans brake discs, increases brake performance, and improves road safety.

These new products from **Tecmaxx** result from innovation and a commitment to delivering high-quality products for professionals, automotive enthusiasts, and industry.

For more information, see page 92.

**MA PROFESSIONAL - EXPANDED RANGE**

We invite you to explore the new offerings from the MA Professional brand, providing solutions tailored to various needs. Our range includes high-quality greases, epoxy primers, DOT3 and DOT5.1 brake fluids, and acrylic paints in various colors. Our products ensure excellent protection and performance for equipment and vehicles. Thanks to our innovative formulas, we guarantee high efficiency and durability under different operating conditions. Choose the products that best meet your needs.

For more information, see page 71.

**MA PROFESSIONAL - USEFUL TOOLS**

The MA Professional brand introduces a new series of workshop tools designed for professionals. The range includes oil filter wrenches, insulating tapes, pliers with a cable for hose clamps, an inflation gun with a pressure gauge, a magnetic tool strip, a trim clip remover, a set of handle hooks, and an air blow gun. These tools aim to facilitate and streamline workshop tasks. This innovative series of tools from MA Professional is the key to more efficient work for every professional.

Equip your workshop with these new tools and discover how they can transform your work!

For more information, see pages 84 and 85.

**MA PROFESSIONAL - RADIGARD COOLANT FLUIDS**

RADIGARD coolant fluids are a new addition to the MA Professional product line. Available in two colors – green and red. RADIGARD fluids come in ready-to-use form and concentrate. They are compatible with any coolant color. These fluids provide excellent protection for the cooling system against corrosion. Suitable for all types of radiators and vehicles, they ensure optimal engine operating temperature. They complement the existing range of MA Professional coolant fluids, highly valued by professional users in service centers and automotive workshops.

## scents

### of nature

Moje Auto INSENTI Organic is a collection of organic air fresheners. The products contain only granules of plant origin (from annual plants) soaked in natural fragrance oils. Organic granules have very good absorption, consistent hardness and excellent balanced scent release. The granules are also heatresistant and can be safely used in full sunlight.

How the nozzle-tip Moje Auto product works

How a competitive product works

Dashboard cleaning agent. Cleans and maintains all plastic components inside the car. Antistatic agent. Reduces dust re-deposition. Leaves the cleaned surfaces shiny, adding some pleasant fresh fragrance. Delays the plastics aging process.

The new, two-phase formula penetrates the surface, protecting it from UV radiation, and leaving a polished layer on the outside. Contrary to traditional products, they do not contain solvents, which guarantees their excellent scent and complete safety for the user.

**PU MICRO MAX PRO MICROFIBER 245 G/M<sup>2</sup>  
49X43 CM**

**NEW**

Microfiber for cleaning and polishing glass and lacquered surfaces. It quickly and easily removes grease and stubborn dirt. By combining regular microfiber with polyurethane, the microfiber is highly absorbent, ensuring effective cleaning without streaks. Polyurethane creates foam-like pores that trap dust and dirt inside the microfiber. The microfiber does not separate, leaves no fibers on the cleaned surface, and effectively dries and polishes the surface. Suitable for both dry and wet use, even without detergents. Laser cut. It withstands washing at 90°C, releasing dirt and bacteria. It is recommended to wash the microfiber at temperatures up to 90°C without using fabric softeners and bleaches. Do not dry on radiators.

# winter offer

The **AMTRA** offer of winter cosmetics includes winter windshield wiper fluid and windscreen defrosters. The offer also includes: a lock de-icer, specialist preparations for car seal maintenance, and products boosting engine startup at low temperatures.

[moje-auto.pl](http://moje-auto.pl)

## DE-ICER

**MOJE AUTO**

### GLASS DE-ICER

Removes ice and snow from exterior windshields. It works instantly (in 5 seconds). Effective at temperatures to -50°C. Leaves no streaks. It can be used to defrost locks.

KTM: **25-011**  
 Cap.: 650 ml  
 12 pcs  
  
 5 905694 001935

## WINTER WASHER FLUIDS

### WASHER FLUID -20°C

Removes frost, salt, slush and other dirt. Prevents the spray nozzles from freezing. Ensures protection up to -20°C. It has a pleasant sea scent.

KTM: **71-006**  
 Capacity: 5 L  
  
 108 pcs 5 905694 001904

### WASHER FLUID -15°C

Removes frost, salt, slush and other dirt. Prevents the spray nozzles from freezing. Ensures protection up to -15°C. It has a pleasant sea scent.

KTM: **71-019**  
 Capacity: 5 L  
  
 108 pcs 5 905694 022848

### WASHER FLUID -80°C

Removes frost, salt, slush and other dirt. Prevents the spray nozzles from freezing. Ensures protection up to -80°C. It has a pleasant sea scent.

KTM: **25-025**  
 Capacity: 1 L  
  
 6 pcs 5 905694 017417

## OTHER WINTER PRODUCTS

### DIESEL DEPRESSANT

Lowers the melting point of diesel fuel. It prevents the formation of paraffin crystals and thickening of the oil at low temperatures. It is sufficient for 500/1000 L of diesel fuel. Improves ignition at low temperature. Removes deposits and carbon deposits from the fuel system. Effective at temperatures up to -40°C.

KTM: **25-014**  
 Cap.: 500 ml  
  
 24 pcs 5 905694 001997

### LOCK DE-ICER

It defrosts, lubricates and preserves. It works instantly. It prevents re-freezing. It has anti-corrosive properties.

 Cap.: 50 ml  
  
 20 pcs 5 905694 001911

# radigard

## car radiator fluids

**RADIGARD** radiator fluids are a new addition to the MA Professional product line. Available in two colors – green and red. Radigard fluids come in both ready-to-use and concentrate forms. They are compatible with any color of radiator fluid. These fluids provide excellent protection for the cooling system against corrosion and are suitable for all types of radiators and vehicles. They ensure the engine operates at an optimal temperature. Radigard fluids complement the existing range of MA Professional radiator fluids, which are highly valued by professional users in automotive services and workshops.

## Radiator Coolant

MA Professional Radiator Coolant is a modern product for car radiators - ready to use and concentrated, with high performance parameters. It can be mixed with other radiator liquids based on ethylene glycol regardless of the color.

- Guarantees optimal working temperature in any conditions - unique composition protects the engine from overheating in the summer and prevents the fluid from freezing in the system in the winter.

- Excellent performance up to max 35°C - "ready to use" fluid (and the concentrate - up to max -64°C, depending on the dilution).
- For all types of radiators - the product is intended for use in radiators made of aluminum and other metal alloys.
- Full engine protection - a special package of anti-corrosive and refining additives prevents the cooling system from corroding, thus guaranteeing the long and effective function of the engine.
- Available in: green, blue and red G12.

# Moje Auto VIRAGE HYBRID Series Hybrid wiper + 9 adapters

Hybrid car wipers are low-profile elements with the blade fully covered and integrated with the arm. Most of all, hybrid wipers have the advantages of both conventional and frameless wipers. Owing to them, the driver can enjoy quiet operation, excellent

pressure and very low losses caused by the rush of air while driving.

## HYBRID Series:

- fit 95% of car models
- even pressure, aerodynamic shape
- teflon-coated rubber
- 9 adapters

## Moje Auto VIRAGE Series of **FRAMED WIPERS** An universal, framed wiper

High-quality universal conventional wiper blade. Fits both passenger cars and delivery trucks. The wiper blade is made of natural rubber. The frame is made of thick galvanized steel covered with a layer protecting from UV radiation and corrosion. Wipers ensuring good visibility all year round. The wiper works along its entire length in both directions owing to the metal joints ensuring excellent pressure

re against the windshield. When they are longer than 53 cm, we apply as many as 8 pressure points. Fifteen different lengths from 27 cm up to 65 cm! The features of the universal, framed wiper series are: excellent visibility all year long, resistance to corrosion and UV light, even pressure at the entire length, no smudges in both directions.

### UNIVERSAL, FRAMED WIPER:

- excellent visibility all year long,
- resistance to corrosion and UV light,
- even pressure at the entire length,
- no smudges in both directions

**MIKALOR**

# clamps

## and hose clamps

**MIKALOR** currently offers one of the most extensive ranges of clamps and hose clamps on the market. This manufacturer provides unique solutions, including high-pressure clamps, worm drive clamps, semi-open clamps, and titanium clamps used in Formula 1 engine bolides, as well as specialized clamps used in the automotive industry for original equipment manufacturing.

ASFA-L

Worm-drive clamps with a 9 mm band are the most popular clamps on the market, used for various mounting applications. They offer a large installation range and a high clamping force of 4 Nm. Precise embossing, raised edges, and a smooth band underside ensure easy and safe installation. The clamps are available in material specifications W1 (galvanized steel) and W2 (stainless steel). Clamps made from materials W3, W4, and W5 are available upon individual request. They are recommended for use under high pressure conditions.

ASFA-S

Worm-drive clamps with a 12 mm band, while retaining all the benefits of ASFA-L clamps, offer a higher installation torque of 6.8 Nm, ensuring complete sealing of high-pressure installations. The special clamp lock design allows for smooth closing and opening without the need for cutting. These clamps are available in material specification W1 (galvanized steel). Clamps made from materials W2, W3, W4, and W5 are available upon individual request. They are recommended for use under high pressure conditions.

MINI CLIP

Clamps made from mild steel, making them ideal for fitting to hoses during installation. They are particularly used for mounting soft and delicate hoses operating under low pressure, such as fuel hoses. Their special design ensures complete safety for the hoses they are mounted on. Made from W1 material (galvanized steel), these clamps are recommended for use under low and medium pressure conditions.

DIN 3021

Self-clamping band for heavy-duty applications, manufactured according to DIN 3021 standard. It is particularly recommended for applications where the temperature can vary from -40°C to +120°C. The design of this clamp ensures a constant clamping force despite sudden temperature changes. Quick and easy installation is an additional advantage of this clamp. Recommended for use under high pressure conditions.

WIRE CLIP

Self-clamping wire hose clamps are a cost-effective fastening solution for certain applications. They are used for securing small diameter hoses operating under low pressure, particularly those with an embedded spiral. Recommended for use under low and medium pressure conditions.

SPRING CLIP

Self-clamping spring hose clamps are designed to evenly distribute the clamping force around the mounting area. Their use is recommended when the hose is exposed to sudden temperature changes, causing expansion and contraction of the materials used in the assembly. Recommended for use under low and medium pressure conditions.

SUPER / SUPRA

High-pressure clamp designed for very demanding applications in installations operating under very high pressure. Made from the highest quality material, depending on the size, with a band width ranging from 16 to 26 mm. It ensures complete sealing in extreme conditions. The unique design and material of the clamp guarantee the highest product quality. Recommended for use under high pressure conditions.

OPASKA OTWARTA

Clamp made of soft metal with a 5 mm band, available in two sizes: 6-11 mm and 7-19 mm, designed for use in applications with limited access to the mounting area. The size and material of the clamp ensure easy and quick installation in cases of restricted access. Made from W2 material (stainless steel), they offer high corrosion resistance. Recommended for use under low and medium pressure conditions.

GALVANIZED HOSE CLAMP SET

The set includes:  
- 11 pcs of galvanized hose clamps

KTM: **20-A33**  
Capacity: 5 kg  
1 pcs 5 905694 004837

## ALU ENGINE CLEANER

Effectively removes heavy dirt from mechanical components of the engine compartment. Safe for aluminum, rubber and painted elements.

KTM: **20-A57**  
Capacity: 1 L  
12 pcs 5 905694 013129

## UNIVERSAL CLEANER

Highly effective, biodegradable detergent -based cleaner for various plastics, ceramics, painted surfaces and fabrics. Leaves the surface clean and fragrant.

KTM: **20-A55**  
Capacity: 1 L  
12 pcs 5 905694 013051

## DEGREASER

Safe for aluminum, ceramics, steel, glass, rubber. Recommended for washing parts of machines.

KTM: **20-A01**  
Capacity: 1 L  
12 pcs 5 905694 009733

## CARBURETOR CLEANER

Cleans carburetors and throttle valves. Removes carbon deposits and other dirt. Helps start the engine easier.

KTM: **20-A05**  
Capacity: 400 ml  
☐ 24 pcs

## EGR CLEANER

Cleans EGR valves and turbochargers. Removes carbon deposits and other dirt. Leaves no residues. Restores engine power. Reduces fuel consumption.

KTM: **20-A22**  
Capacity: 400 ml  
☐ 24 pcs

## EGR CLEANER

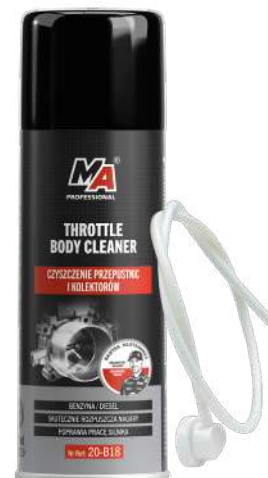

Extremely effective product removing very stubborn dirt deposited in EGR valves. It dissolves greasy and burnt soot hindering the proper functioning of the valve.

KTM: **20-A56**  
Capacity: 650 ml  
☐ 12 pcs

## THROTTLE BODY CLEANER

A very effective product for cleaning throttles and manifolds. It dissolves and removes burnt carbon deposits and others heavy dirt. Available with a special hose allowing for reaching throttles deep inside the system.

KTM: **20-B18**  
Capacity: 400 ml  
☐ 24 pcs

## BRAKE CLEANER

Effectively cleans and degreases. Quickly evaporates from the cleaned surface.

KTM: **20-A06**  
Capacity: 5 L  
☐ 1 pcs

KTM: **20-A26**  
Capacity: 600 ml  
☐ 12 pcs

KTM: **20-B64**  
Capacity: 750 ml  
☐ 15 pcs

KTM: **20-A107**  
Capacity: 30 L  
☐ 1 pcs

KTM: **20-B50**  
Capacity: 500 ml  
☐ 30 pcs

Intensive degreaser with the addition of acetone for quick and thorough removal of many difficult contaminants from oil, glue, paints, etc. Recommended for many assembly activities and surface preparation before gluing and painting.

KTM: **20-B70**  
Capacity: 600 ml  
☐ 12 pcs

## ACE POWER CLEANER

# CLEANING AND DEGREASING

## CONTACT CLEANER

Cleans and protects contacts and electrical connectors. It ensures proper functioning of the electrical system.

KTM: **20-A04**  
Capacity: 250 ml  
24 pcs 5 905694 009764

KTM: **20-A46**  
Capacity: 250 ml  
24 pcs 5 905694 012207

## DIESEL PARTICULATE FILTER CLEANER

Cleaning agent for DPF particulate filters located in the exhaust system. Dissolves and removes carbon deposits without the need to disassemble.

KTM: **20-A92**  
Capacity: 5 L  
1 pcs 5 905694 016106

KTM: **20-A90**  
Capacity: 400 ml  
12 pcs 5 905694 015437

## AIR FLOW SENSOR CLEANER

Quick-drying. It does not contain glycol or chlorine. Precise applicator.

KTM: **20-A50**  
Capacity: 250 ml  
24 pcs 5 905694 012320

# CONSERVATION

## UNDERSEAL

Protects the underbody and sills from stones. Prevents corrosion. Makes the underbody operate more quiet. Black colour.

KTM: **20-A09**  
Cap.: 600 ml  
24 pcs 5 905694 009818

## UNDERSEAL

Anti-corrosion coating based on bitumen and rubber protecting the underbody against stones, water and corrosion. It can also be used as a sound absorbing material, for instance on wheel arches, etc.

KTM: **20-B21**  
Cap.: 1 L  
6 pcs 5 905694 021063

## UNDERSEAL

Anti-corrosion coating based on bitumen and rubber protecting the underbody against stones, water and corrosion. It can also be used as a sound absorbing material, for instance on wheel arches, etc.

KTM: **20-B22**  
Cap.: 1 kg  
6 pcs 5 905694 021070

**ANTI GRAVEL COATING**

Spray-on anti-corrosive coating based on resins to protect sensitive painted vehicle parts such as sills, doors, wheel arches, front and rear aprons from stones, water and corrosion. Completely paintable.

KTM: **20-B19**  
Cap.: 600 ml  
24 pcs 5 905694 021049

**ANTI GRAVEL COATING**

Spray-on anti-corrosive coating based on resins to protect sensitive painted vehicle parts such as sills, doors, wheel arches, front and rear aprons from stones, water and corrosion. Completely paintable.

KTM: **20-B20**  
Cap.: 1 l  
6 pcs 5 905694 021056

**INSIDE COATING**

Protects against moisture. Prevents corrosion. Protects close profiles.

KTM: **20-A30**  
Cap.: 600 ml  
20 pcs 5 905694 011446

**RUST CONVERTER + EPOXY PRIMER  
2 IN 1**

High-quality epoxy resin-based rust neutralizer for direct application to rust. It activates on contact with rust, neutralizes it and forms a durable primer and undercoat, which can be painted after approximately eight hours. Various types of primers, paints or polyester putties can be applied to the product.

KTM: **20-B25**  
Capacity: 100 ml  
12 pcs 5 905694 021810

KTM: **20-B26**  
Capacity: 250 ml  
12 pcs 5 905694 021827

**RUST CONVERTER + EPOXY PRIMER**

High-quality rust neutralizer in aerosol form, applied directly to rust. It activates upon contact with rust, neutralizes it, and creates a durable priming coat that can be painted over after approximately eight hours. Various types of primers, paints, or polyester fillers can be applied on top of the product. The neutralizer has excellent anti-corrosion and priming properties.

KTM: **20-B39**  
Capacity: 400 ml  
12 pcs 5 905694 023289

**EPOXY PRIMER**

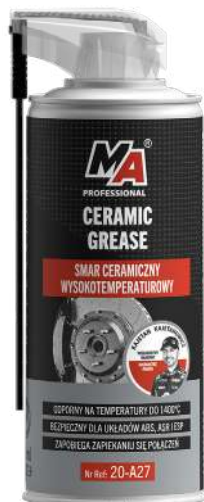

Epoxy primer protecting metal surfaces against corrosion. After curing, the primer can be varnished using various paints and varnishes. A special formulation containing epoxy resins allows the primer to be used directly on sheet metal, aluminum and galvanized steel. The preparation has very good adhesion to the surface and high anti-corrosion properties.

KTM: **20-B56**  
Capacity: 500 ml  
12 pcs 5 905694 024002

**NEW**

CERAMIC GREASE

Resistant to extreme temperatures to +1400°C. Safe for ABS, ASR and ESP systems. Resistant to acids and water. It prevents mechanical connections from getting stuck. Special applicator enables precise application.

KTM: **20-A27**  
Capacity: 400 ml  
24 pcs 5 905694 011408

PTFE GREASE

Reduces friction. Operates in the range from -40°C to +180°C. Resistant to water and salt. Special applicator enables precise application.

KTM: **20-A28**  
Capacity: 400 ml  
24 pcs 5 905694 011415

KTM: **20-A70**  
Capacity: 200 ml  
24 pcs 5 905694 013433

PENETRATING SILICONE LUBE

Waterproof. Protects from moisture. Special applicator enables precise application.

KTM: **20-A48**  
Capacity: 400 ml  
24 pcs 5 905694 012238

KTM: **20-A67**  
Capacity: 200 ml  
24 pcs 5 905694 013402

SILICONE LUBE

Thick silicone grease. It does not contain solvents. Completely safe for rubber and plastic elements.

KTM: **20-A08**  
Capacity: 400 ml  
24 pcs 5 905694 009801

LUBRICANT MoS<sub>2</sub>

Removes oxides. Penetrates strongly. Protects metals.

KTM: **20-A07**  
Capacity: 400 ml  
24 pcs 5 905694 009795

KTM: **20-A71**  
Capacity: 150 ml  
24 pcs 5 905694 013501

LUBRICANT MoS<sub>2</sub>

Removes oxides. Penetrates strongly. Protects metals.

KTM: **20-A72**  
Capacity: 250 ml  
24 pcs 5 905694 013518

KTM: **20-A73**  
Capacity: 500 ml  
24 pcs 5 905694 013525

**WHITE GREASE**

It easily penetrates areas that are difficult to access, it does not drip from vertical surfaces. Displaces water and protects against corrosion. Lubricates and protects seat hinges, guides, etc.

KTM: **20-A03**  
Capacity: 400 ml  
24 pcs 5 905694 009757

KTM: **20-A68**  
Capacity: 200 ml  
24 pcs 5 905694 013419

**WHITE LITHIUM GREASE**

Multipurpose NLGI 2 grade lubricant. Owing to the white colour, it is well visible on the surface. Resistant to high pressure. Recommended for most bearings, moving joints and screws operating under normal load, used in devices and motor vehicles, in households and in industry. It lubricates, reduces wear and rejects water.

KTM: **20-A44**  
Cap.: 400 ml  
24 pcs 5 905694 017790

**HIGH LOAD BEARING GREASE EP2**

Effectively reduces the wear of bearings. Resistant to high temperatures from -30 to 180°C. Contains a special formulation of carefully selected additives which provide extraordinary anti-wear and anti-corrosive properties. Distinguished by its very high adhesion and resistance to water washing.

KTM: **20-A49**  
Cap.: 400 ml  
12 pcs 5 905694 016373

**COPPER GREASE SPRAY 1000°C**

Water resistant. Protects against corrosion, prevents seizure of parts. Resistant to temperature from -40°C to +1000°C.

KTM: **20-A10**  
Capacity: 400 ml  
24 pcs 5 905694 009825

KTM: **20-A69**  
Capacity: 200 ml  
24 pcs 5 905694 013426

**CHAIN LUBE**

Lubricant for motorcycle chains. Penetrates quickly, and then solidifies in the form of thick lubricating paste. Distinguished by its very high adhesion and resistance to water washing. Contains a special formulation of additives with extraordinary anti-wear and anti-corrosive properties. Suitable for O-rings, Z-rings, and X-rings.

KTM: **20-A93**  
Cap.: 400 ml  
24 pcs 5 905694 016489

**HI TACK GREASE**

Semi-synthetic, waterproof grease with additives that ensure excellent lubricating properties, long-term operation and anti-corrosion protection. It is characterised by a very high resistance to high pressure, impact shocks, vibrations and loads. Designed for the lubrication of highly loaded elements. It is resistant to temperatures ranging from -25°C to +220°C.

KTM: **20-B03**  
Cap.: 400 ml  
12 pcs 5 905694 019169

## INJECTOR GREASE

Special semi-synthetic grease for installation of injectors and glow plugs, and other applications exposed to very high temperatures. The product allows for easier disassembling of protected elements. The grease rejects moisture and protects against corrosion. Operating temperature: -40 to 1400°C.

KTM: **20-A102**

Cap.: 50 g

12 pcs

## BRAKE CALIPER LUBE

Special grease for lubrication of moving parts in the brake system such as clamps, guides, pins and pistons during installation. It ensures proper functioning of the system. It prevents corrosion and seizure. Operating temperature: -40 to 220°C.

KTM: **20-A103**

Cap.: 50 g

12 pcs

## CERAMIC LUBE

Strongly adhesive ceramic grease resistant to extreme loads and temperatures up to 1400°C. It protects highly loaded elements exposed to weather conditions against wear. It protects metal elements against corrosion and the so-called electrolytic corrosion. It does not contain metals. Operating temperature: -40 to 1400°C.

KTM: **20-A104**

Cap.: 50 g

12 pcs

## HIGH LOAD BEARING GREASE EP2

High-performance bearing grease. Guarantees excellent lubricating properties. Reduces rolling friction. Effectively reduces bearing wear. Distinguished by its very high adhesion to surfaces and resistance to water washing. Operating temperature: -30 to 180°C.

KTM: **20-A105**

Cap.: 50 g

12 pcs

## COPPER GREASE

Copper-based grease protecting metal components operating at high temperatures. Prevents seizure and blocking of mechanisms.

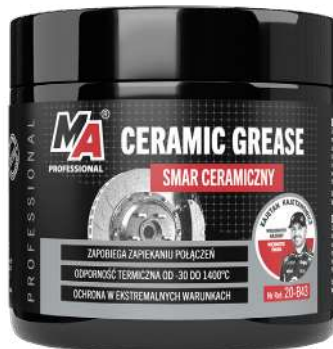

KTM: **20-A58**

Capacity: 500 g

12 pcs

## CERAMIC GREASE

Ceramic assembly paste resistant to extreme temperatures and loads. Dedicated to automotive applications and demanding industries. The product is recommended for works on the assembly of braking systems with ABS and ESP systems, and wherever there is a temperature above 300°C at which ordinary lubricants begin to condense.

KTM: **20-B43**

Capacity: 500 g

12 pcs

## BEARING GREASE

High-quality bearing grease enriched with special EP2 additives that provide maximum protection for heavily loaded bearings operating in difficult conditions. It radically reduces friction and wear, shows high resistance to water and oxidation. Protects against corrosion. Perfect for lubricating all types of rolling and sliding bearings operating in a wide range of temperatures. The grease is highly resistant to mechanical and thermal aging factors.

KTM: **20-B44**

Capacity: 500 g

12 pcs

**SILICONE GREASE**

**NEW**

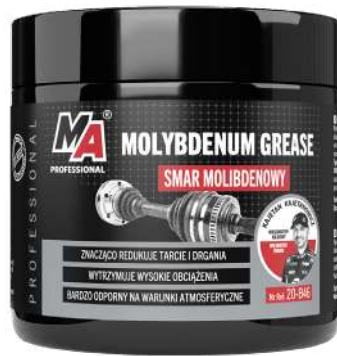

High-temperature, universal silicone grease designed to lubricate and protect metal, glass, ceramics and plastics. It forms a thin, colorless lubricating film that eliminates friction. The product has excellent preservative and caring properties. Thanks to strong hydrophobic properties, it protects the interior of locks against freezing. The agent has antistatic properties and prevents creaking. It is ideal for lubricating cooperating elements made of various materials, e.g. metal and plastic.

KTM: **20-B45**  
Capacity: 500 g  
12 pcs 5 905694 023562

**MOLYBDENUM GREASE**

**NEW**

High-quality grease with anti-seize additives (molybdenum disulfide) designed for use in the most difficult operating conditions. Perfectly withstands high loads. Dedicated to joints and other very demanding applications in truck transport and heavy industry. The special composition of lithium thickener, lubricant additives and molybdenum disulfide allows for use in places particularly exposed to high dust levels and the presence of water. The grease is characterized by very good mechanical stability, oxidation and corrosion resistance.

KTM: **20-B46**  
Capacity: 500 g  
12 pcs 5 905694 023579

**GRAPHITE GREASE**

**NEW**

Grease especially recommended for lubrication and protection of elements exposed to high loads and weather conditions, such as: vehicle springs, truck saddles, open gears and other heavily loaded elements. High water resistance, good corrosion protection. Excellent adhesion to the substrate of elements operating in the temperature range from -20°C to +60°C. Not suitable for the lubrication of rolling and plain bearings.

KTM: **20-B47**  
Capacity: 500 g  
12 pcs 5 905694 023586

**COPPER GREASE**

**NEW**

High-quality copper-based grease to protect metal parts operating at high temperatures. Prevents corrosion and seized and blocked connections. Allows subsequent quick and safe disassembly. Copper grease is not recommended for aluminum components.

KTM: **20-B48**  
Cap.: 50 g  
12 pcs 5 905694 023524

**SILICONE GREASE**

**NEW**

High-temperature, universal silicone grease designed to lubricate and protect metal, glass, ceramics and plastics. It forms a thin, colorless lubricating film that eliminates friction. The product has excellent preservative and caring properties. Thanks to strong hydrophobic properties, it protects the interior of locks against freezing. The agent has antistatic properties and prevents creaking. It is ideal for lubricating cooperating elements made of various materials, e.g. metal and plastic.

KTM: **20-B49**  
Cap.: 50 g  
12 pcs 5 905694 023531

**BEARING GREASE**

**NEW**

A universal lithium grease for use in all anti-friction and plain bearings subjected to regular conditions. It can also be used to lubricate low-speed gears, joints and guides. Resistant to washing out with water, provides protection against corrosion in a humid environment. It has a wide range of applications throughout the industry and automotive sector.

KTM: **20-B60**  
Cap.: 400 g  
12 pcs 5 905694 024231

**BEARING GREASE EP2**

**NEW**

A premium quality lithium grease for use in all anti-friction and plain bearings subjected to high load conditions. It can also be used to lubricate low-speed gears, joints and guides. Resistant to washing out with water, provides protection against corrosion in a humid environment. It has a wide range of applications throughout the industry and automotive sector.

KTM: **20-B61**  
Cap.: 400 g  
12 pcs 5 905694 024248

# TABLE OF PROPERTIES OF MA PROFESSIONAL LUBRICANTS

KTM	Product	Packing	Capacity / Weight	Penetration	Lubrication	Resistance to weather conditions	Resistance to temperature	Additional functions	Typical applications
<b>20-A03</b> <b>20-A68</b>	White Grease	spray	400 ml 200 ml	medium	high	high	up to 120°C	Penetrates tight connections and solidifies into a lubricating paste.	Door hinges, seat rails door stoppers
<b>20-A08</b>	Silicone Lube	spray	400 ml	medium	high	medium	up to 160°C	Universal, solvent-free, safe for rubber.	Setting of rubber hoses on metal nipples, protection of rubber seals
<b>20-A10</b> <b>20-A69</b>	Copper Grease	spray	400 ml 200 ml	medium	high	medium	up to 1000°C	Prevents the seizing of connections at high temperatures.	Wheel hub pins, screws in the exhaust system
<b>20-A27</b>	Ceramic Grease	spray	400 ml	low	high	high	up to 1400°C	Prevents the seizing of connections at high temperatures, safe for aluminum.	Greasing elements in the braking system, such as calipers, pivots
<b>20-A28</b> <b>20-A70</b>	PTFE Grease	spray applicator	400 ml 200 ml	high	high	high	up to 120°C	Thanks to the content of PTFE, it significantly reduces friction.	Lubrication of various mechanic chains
<b>20-A44</b>	White Lithium Grease	spray	400 ml	medium	high	high	up to 150°C	Penetrates tight connections and solidifies into a lubricating paste.	Hinges, doors, locks, engine and trunk covers
<b>20-A48</b> <b>20-A67</b>	Penetrating Silicone Lube	spray applicator	400 ml 200 ml	very high	medium	medium	up to 100°C	Seals the cooperating moving parts of actuators.	Greasing of small elements
<b>20-A49</b>	High Load Bearing Grease EP2	spray	400 ml	medium	high	high	up to 180°C	Significantly reduces friction, extending the lifespan of bearings.	Lubrication of bearings
<b>20-A58</b> <b>20-B48</b>	Copper Grease High Temperature	can tube	500 g 50 g	very low	high	very high	up to 1000°C	Prevents the seizing of connections at high temperatures.	Manifold mounting screws, screws in the exhaust system, hub pins
<b>20-A93</b>	Chain Lube	spray	400 ml	high	high	high	up to 150°C	Thanks to the PTFE content, it remains visible on the surface of the chain.	Lubricant for motorcycle chains
<b>20-A102</b>	Injector Grease	tube	50 g	low	high	high	up to 1400°C	Prevents the seizing of connections at high temperatures.	Glow plugs, injectors, and other highly stressed components operating at very high temperatures.
<b>20-A103</b>	Brake Lube	tube	50 g	low	high	high	up to 220°C		Lubrication of brake pistons during assembly.
<b>20-A104</b> <b>20-B43</b>	Ceramic Lube	can tube	500 g 50 g	low	high	high	up to 1400°C	Prevents the seizing of connections at high temperatures, safe for aluminum.	Wheel hub studs, manifold bolts, exhaust system bolts, and other connections operating at high temperatures.
<b>20-A105</b>	Hi Load Bearing Grease EP2	tube	50 g	low	high	high	up to 180°C	Significantly reduces friction, extending the lifespan of bearings.	Lubrication of bearings.
<b>20-B03</b>	High Adhesion Grease	spray	400 ml		high	high		High protection factor against atmospheric agents.	Lubrication of guides, lines, and other equipment operating under heavy load.
<b>20-B44</b>	Bering Grease EP 2	can	500 g	very low	high	high	up to 180°C	Significantly reduces friction, extending the lifespan of bearings.	Lubrication of bearings.
<b>20-B45</b> <b>20-B49</b>	Silicone Grease	can tube	500 g 50 g	very low	high	high	up to 230°C	High resistance to water and temperature..	
<b>20-B46</b>	Molybdenum Grease	can	500 g	very low	high	high	up to 140°C	Withstands high loads, resistant to atmospheric conditions.	Lubrication of joints and other highly demanding applications in heavy transport and heavy industry.
<b>20-B47</b>	Graphite Grease	can	500 g	very low	high	high	up to 60°C	Withstands high loads, resistant to atmospheric conditions.	Lubrication and protection of components operating in adverse weather conditions and subjected to high loads.
<b>20-B60</b>	Bering Grease tT43	cartouche	400 g	very low	high	high	up to 130°C		Lubrication of bearings.
<b>20-B61</b>	Bering Grease EP2	cartouche	400 g	very low	high	high	up to 140°C		Lubrication of bearings.

**RED HI-TEMP SILICONE GASKET MAKER**

Replaces traditional gaskets. Safe for oxygen sensors. Resistant to high temperatures to +343°C.

KTM: **20-A35**  
Capacity: 290 g  
12 pcs 5 905694 011521

KTM: **20-A12**  
Capacity: 85 g  
12 pcs 5 905694 009863

KTM: **20-A17**  
Capacity: 32 g  
12 pcs 5 905694 010029

**BLACK HI-TEMP SILICONE GASKET MAKER NEUTRAL**

Replaces traditional gaskets. Safe for oxygen sensors. Resistant to high temperatures to +329°C.

KTM: **20-A34**  
Capacity: 290 g  
12 pcs 5 905694 011514

KTM: **20-A11**  
Capacity: 85 g  
12 pcs 5 905694 009856

KTM: **20-A16**  
Capacity: 32 g  
12 pcs 5 905694 010012

**GREY HI-TORQUE SILICONE GASKET MAKER NEUTRAL 399°C**

Replaces traditional gaskets. Safe for oxygen sensors. Resistant to high loads and temperatures to +399°C. Acetic-free.

KTM: **20-A13**  
Capacity: 100 g  
12 pcs 5 905694 009870

KTM: **20-A18**  
Capacity: 32 g  
12 pcs 5 905694 010036

**EXHAUST SYSTEM CEMENT**

Solidifies quickly. Eliminates exhaust blow-by. Mutes the exhaust system.

KTM: **20-A53**  
Capacity: 150 g  
12 pcs 5 905694 012337

**EPOXY 5 MINUTES CLEAR DOUBLE SYRINGES 25 ML**

Quick-drying transparent epoxy glue intended for repairing damaged/cracked objects made of various hard materials such as wood, ceramics, plastic, glass and many others. It creates a very hard binder resistant to atmospheric conditions and temperatures up to 80°C. After hardening, it is resistant to car, gear and hydraulic oils, gasoline, water and many other substances. Initial hardening after 4 to 10 minutes depending on the ambient temperature. After one hour, the product is 80% hardened. Full hardening occurs after 24 hours.

KTM: **20-B71**  
Capacity: 25 ml  
12 pcs 5 905694 024736

**SUPER METAL EXTREME 70% STALI 10 MIN.**

Highest quality epoxy-steel repair putty containing 70% steel, designed for quick and durable repairs of damaged components made from various metals. It quickly hardens to form a very hard joint that is resistant to atmospheric conditions, chemicals, and temperatures ranging from -60°C to 120°C. After full curing, the joint can be mechanically processed or painted. The putty has extraordinary properties for filling gaps in the material.

KTM: **20-B71**  
Capacity: 25 ml  
12 pcs 5 905694 024811

## EPOXY METAL 5 MIN

Solidifies quickly (5 minutes). Resistant to over 170 standard atmospheres. When it solidifies, it can be processed mechanically.

KTM: **20-A43**  
 Cap.: 25 ml  
 12 pcs 5 905694 011989

## GREY POWER PLASTIC EXTREME

Methacrylate structural adhesive for very strong bonding / filling of numerous materials. Resistant to weather conditions and temperatures from -40°C to +180°C.

KTM: **20-A99**  
 Cap.: 25 ml  
 12 pcs 5 905694 017837

## BLACK POWER PLASTIC EXTREME

Methacrylate structural adhesive for very strong bonding / filling of numerous materials. Resistant to weather conditions and temperatures from -40°C to +180°C.

KTM: **20-A100**  
 Cap.: 25 ml  
 12 pcs 5 905694 017844

## INSTANT STRUCTURAL ADHESIVE

Bonds immediately (2 - 6 seconds). It has an applicator enabling precise dosage

KTM: **20-A45**  
 Cap.: 10 g  
 12 pcs 5 905694 012061

## PLASTIC WELD GREY

Withstands over 270 standard atmospheres. Solidifies in 10 minutes. Works on joined surfaces.

KTM: **20-A42**  
 Cap.: 25 ml  
 12 pcs 5 905694 011972

## PLASTIC WELD BLACK

Withstands over 270 standard atmospheres. Solidifies in 10 minutes. Works on joined surfaces.

KTM: **20-A54**  
 Cap.: 25 ml  
 12 pcs 5 905694 012795

## SPRAY ADHESIVE

It glues various materials permanently and quickly. Waterproof and flexible.

KTM: **20-A37**

Cap.: 400 ml

5 905694 011583

24 pcs

## BLACK AUTOMATIC SILICONE GASKET MAKER 260°C

Black silicone sealant used to form permanent seals of mechanical components. Automatic pressure container facilitates spreading of the sealing mass. Resistant to temperature to 260°C.

KTM: **20-A97**

Cap.: 200 ml

5 905694 017639

12 pcs

## GREY AUTOMATIC SILICONE GASKET MAKER 260°C

Black silicone sealant used to form permanent seals of mechanical components. Automatic pressure container facilitates spreading of the sealing mass. Resistant to temperature to 260°C.

KTM: **20-B23**

Cap.: 200 ml

5 905694 021155

12 pcs

## FUEL TANK REPAIR KIT

Repair mass for quick and permanent repair of damaged/ perforated metal fuel tanks. When solidified, it is highly resistant to gasoline and diesel fuel.

KTM: **20-B15**

Cap.: 56 g

5 905694 020257

12 pcs

## EPOXY ALUMINIUM REPAIR

Repair mass for quick and permanent repair of damaged/ cracked elements made of aluminium and other metals.

KTM: **20-B17**

Cap.: 56 g

5 905694 020585

12 pcs

## COLD WELDING COMPOUND 4 MINUTES

Strong as steel. Solidifies quickly - 4 minutes. Suitable for mechanical machining.

KTM: **20-A40**

Cap.: 56 g

5 905694 011873

12 pcs

**THREADLOCK  
MEDIUM STRENGTH  
BLUE MA243**

Prevents loosening of connections. Seals joints. Prevents corrosion.

KTM: **20-A14**  
Cap.: 10 ml  
12 pcs 5 905694 010043

**THREADLOCK  
HIGH STRENGTH  
RED MA262**

Prevents loosening of connections. Seals joints. Prevents corrosion. Withstands high loads.

KTM: **20-A15**  
Cap.: 10 ml  
12 pcs 5 905694 010050

**THREADLOCK

12 pcs 5 905694 017509

## SUPER ACTIVE FOAM

Concentrated foaming agent for washing passenger car bodies. Combination of high performance with additives adding gloss to the paint, it produces excellent visual effects.

KTM: **20-A80**  
Capacity: 1 kg  
5 905694 013983

KTM: **20-A81**  
Capacity: 5 kg  
5 905694 013990

## DIMMEX 2-FAZE

Very concentrated foaming solution for preliminary and proper washing. Effectively dissolves and removes road dirt, fat, grease and other stubborn stains without the use of a brush or sponge.

KTM: **20-A84**  
Capacity: 10 kg  
5 905694 015963

KTM: **20-A82**  
Capacity: 5 kg  
5 905694 014072

## DEFATEX

Has a strong degreasing effect. Safe for all surfaces.

KTM: **20-A02**  
Capacity: 5 L  
5 905694 009740

## ANTY-OIL

Dissolves grease and lubricants effectively. For daily care. For manual and machine washing.

KTM: **20-A19**  
Capacity: 5 L  
5 905694 009993

## ACTIVE MIX

Very concentrated foaming solution for preliminary and proper washing. Effectively dissolves and removes road dirt, fat, grease and other stubborn stains without the use of a brush or sponge.

KTM: **20-B66**  
Capacity: 1 L  
5 905694 024651

KTM: **20-B62**

NEW

ENGINE FLUSH

Safe for all types of engines. Cleans quickly and effectively.

KTM: **20-A38**  
Cap.: 374 ml  
24 pcs  
5 905694 021759

ENGINE FLUSH POWER TEC

NEW

Professional preparation for flushing the oil system of combustion engines, based on high-performance solvents and toluene. It effectively dissolves hard carbon deposits, sludge, and other contaminants. It releases seized rings, increases compression in cylinders, and enhances engine power. It restores full flow capacity to oil channels.

KTM: **20-B40**  
Cap.: 500 ml  
12 pcs  
5 905694 023296

KTM: **20-B65**  
Cap.: 2,5 l  
6 pcs  
5 905694 024644

DIESEL ENGINE FLUSH POWER TEC

NEW

Professional preparation for intensive flushing of the oil system of diesel engines based on high-performance solvents. Quickly and effectively dissolves hard carbon deposits and other difficult-to-remove dirt occurring in the lubrication system of diesel engines. Prepares the oil system for new oil.

KTM: **20-B67**  
Cap.: 500 ml  
12 pcs  
5 905694 024682

MOTO START

Effective even to -50°C. Safe for all types of engines. For petrol engines, diesel engines, motorcycles, lawn mowers, saws.

KTM: **20-A20**  
Cap.: 200 ml  
24 pcs  
5 905694 010128

CERAMIC ENGINE PROTECTOR

New generation multi-functional ceramic engine oil additive to protect the engine even under the most extreme conditions. Significantly reduces friction, quieter the engine and lowers fuel consumption.

KTM: **20-B28**  
Cap.: 300 ml  
12 pcs  
5 905694 022527

ATF FLUSH

Highly efficient preparation for flushing automatic gearboxes before changing the oil. Dissolves and removes deposits and other contaminants found in automatic transmissions, ensures optimum transmission efficiency and improves smooth shifting performance.

KTM: **20-B29**  
Cap.: 300 ml  
12 pcs  
5 905694 022534

ENGINE OIL STOP LEAK

NEW

Stops and prevents oil leaks through seals and eliminates the need for costly repairs. Reduces oil consumption. Restores flexibility to old seals and gaskets, thereby reducing leaks and oil burning through valve seals.

KTM: **20-B51**  
Cap.: 300 ml  
12 pcs  
5 905694 023951

## GEARBOX OIL TREATMENT

**NEW**

A professional additive for transmission oil that reduces friction and wear of drive transmission components. It significantly improves the durability of the lubricating film and reduces noise from worn mechanisms, ensuring long and efficient operation of the gearbox. It eliminates minor leaks. The product can be used in manual transmissions and differentials.

KTM: **20-B41**  
 Cap.: 150 ml  
 12 pcs  
 5 905694 023319

## ENGINE DOKTOR

**NEW**

A modern, high-performance engine oil additive that stabilizes its viscosity and durability at high temperatures. It reduces oil consumption in gasoline and diesel engines. Enhances compression and quiets engine operation. Provides additional protection for highly worn engines. This engine oil additive is suitable for engines showing signs of wear.

KTM: **20-B42**  
 Cap.: 444 ml  
 24 pcs  
 5 905694 023388

## DIESEL FLUSH

Professional concentrated preparation for cleaning the entire injection system and combustion chamber in diesel engines. It saves fuel, significantly improves the combustion process. Restores engine power and performance. It can be used in all types of diesel engines.

KTM: **20-B30**  
 Cap.: 500 ml  
 12 pcs  
 5 905694 022541

## DISPOSABLE NITRILE GLOVES BLACK 500

**NEW**

Black nitrile gloves, disposable, resistant to tearing and abrasion.

Size L  
 KTM: **20-RN1**

## BELT DRESSING

Prevents the v-belt from slipping. Extends its lifetime. Eliminates squeaks. Increases the belt's effectiveness.

KTM: **20-A29**  
 Cap.: 400 ml  
 24 pcs  
 5 905694 011439

## COMPRESSED AIR FREEZE SPRAY -50°C

Compressed air for blowing dust out of hard-to-reach places or for freezing. In the up-valve position, a powerful jet of compressed air blows dusts away from hard-to-reach places, while when the container is turned 180° with the valve down, it acts as a freezer.

KTM: **20-B24**  
 Cap.: 600 ml  
 15 pcs  
 5 905694 021179

## OTHER SERVICE PRODUCTS

### INJECTOR LOOSENER WITH PTFE

A product facilitating disassembly of injectors, glow plugs and other seized and corroded joints, with a freezing effect. It penetrates perfectly, and rapidly cools tight and corroded connections to facilitate their disassembly.

KTM: **20-A98**  
Cap.: 400 ml  
24 pcs 5 905694 017646

### LPG TESTER

For all gas media and air conditioning. Totally non-flammable. Works in an inverted position of 180°.

KTM: **20-A25**  
Cap.: 500 ml  
24 pcs 5 905694 011385

### HAND CLENER

A very effective paste gentle to the hands, with added abrasive to remove stubborn dirt from the hands. It does not dry out the skin owing to the content of skin care ingredients. It has undergone comprehensive dermatological tests required for cosmetics.

KTM: **20-A61**  
Cap.: 5 kg  
1 pcs 5 905694 013273

KTM: **20-A60**  
Cap.: 600 g  
12 pcs 5 905694 013266

### HAND CLENER MAX

High-quality paste for cleaning very dirty hands, based on natural agents and wood-chips. Contains cosmetic agents regenerating damaged hands. It has undergone comprehensive dermatological tests required for cosmetics.

KTM: **20-B27**  
Cap.: 5 kg  
1 pcs 5 905694 022114

KTM: **20-A62**  
Cap.: 450 g  
12 pcs 5 905694 020271

## POWER STEERING FLUIDS

### POWER STEERING FLUID

High-quality mineral oil intended for power steering systems of vehicles compliant with Dexron II D specification. Ensures proper operation of the pump.

KTM: **20-A78**  
Cap.: 1 L  
12 pcs 5 905694 013914

KTM: **20-A79**  
Cap.: 500 ml  
12 pcs 5 905694 013921

### POWER STEERING FLUID WITH STOP LEAK

Power steering fluid with sealant, eliminates fluid leaks effectively. Contains high-quality oil enriched with additives that regenerate old seals. Miscible with any other power-assisted steering fluid.

KTM: **20-A91**  
Cap.: 300 ml  
12 pcs 5 905694 015444

## RADIATOR DEGREASER

Removes oil from the cooling system. Prevents corrosion of the system. Safe for the whole cooling system.

KTM: **20-A47**  
 Cap.: 1 L  
 12 pcs  
 5 905694 012146

## RADIATOR SEALANT

Effectively eliminates leaks. It does not clog channels of the cooling system. For all types of radiators and heaters.

KTM: **20-A41**  
 Cap.: 400 ml  
 12 pcs  
 5 905694 011880

## RADIATOR FLUSH

Cleans the cooling system quickly. It prevents the engine from overheating. For all types of radiators.

KTM: **20-A31**  
 Cap.: 400 ml  
 12 pcs  
 5 905694 007005

# OPERATING FLUIDS

## BRAKE FLUID DOT 3

NEW

DOT 3 is a universal brake fluid with very good performance properties, used in the braking systems of medium loaded vehicles. Intended for hydraulic braking and clutch systems of passenger cars, trucks, buses, trailers, motorcycles, etc. in accordance with the vehicle manuals where the manual requires the use of DOT-3 fluid.

KTM: **20-B52**  
 Capacity: 485 g  
 24 pcs

## BRAKE FLUID DOT 4

NEW

DOT-4 is a modern brake fluid with very good functional properties, characterized by a boiling point above 230°C. It is intended for hydraulic brake and clutch systems of passenger cars, trucks, buses, trailers, motorcycles, battery trolleys, etc. in accordance with the vehicle operating instructions.

KTM: **20-B53**  
 Capacity: 1 kg  
 17 pcs

KTM: **20-B63**  
 Capacity: 485 g  
 24 pcs

KTM: **20-B54**

## BRAKE FLUID DOT 5.1

NEW

DOT 5.1 is the highest quality brake fluid intended mainly for brake and clutch systems of high-power vehicles operating in extreme operating conditions and for sports cars, as well as for ABS, ESP, ASR and other systems generating extremely high fluid temperatures. Ensures safety and high braking efficiency. Suitable for braking systems that are designed to use synthetic fluids.

KTM: **20-B55**  
 Capacity: 485 g  
 24 pcs

BRAKE CALIPER SPRAY

The enamel is intended for protecting brake calipers and drums against corrosion made on the basis of the highest quality resins. It creates a durable coating with a very high gloss, resistant to brake dust, salt, chemicals and gasoline. It has anti-corrosive properties. The paint withstands heating up to 160°C. The product can be used in car tuning. The paint is resistant to abrasion, scratches, bumps and petrol. Available in 4 colors (black, red, silver, yellow).

**OIL FILTER WRENCH**

**NEW**

Oil filter wrench made of a steel clamp band, featuring ridges that prevent the wrench from slipping on the filter. The clamp allows for wide adjustment.

Supported filter diameters: 60-105 mm

KTM: **20-N03**  
50 pcs 5 905694 023791

**GUN WITH PRESSURE GAUGE FOR INFLATING WHEELS**

**NEW**

Tire inflator gun with pressure gauge. Equipped with a standard 1/4" plug compatible with quick connectors. The gauge is protected by a special rubber cover to prevent potential damage. A thumb-accessible valve allows for air pressure adjustment in the tire. The gun is made of high-quality aluminum alloys, making it ideal for tire repair shops.

KTM: **20-N04**  
50 pcs 5 905694 023807

**PLIERS WITH CORD FOR CABLE TIES**

**NEW**

The pliers are used for clamping expansion clamps on flexible, fuel, oil, and water hoses. They also feature a five-step mechanism that automatically locks them in the closed position. The long cable (630 mm) allows for work in hard-to-reach places.

KTM: **20-N05**  
30 pcs 5 905694 023814

**MAGNETIC STRIP 50 CM**

**NEW**

The magnetic strip allows for the storage of various tools such as wrenches, screwdrivers, and pliers. It is made of a steel profile filled with a magnet. The strip can hold a weight of up to 13 kg. This tool strip facilitates workshop work by organizing and displaying the most needed tools. The strip can be mounted on walls made of brick, concrete, drywall, or wood.

KTM: **20-N06**  
10 pcs 5 905694 023821

**WIPER ARM PULLER**

**NEW**

Professional two-arm puller for terminals and wiper arms, featuring a strong construction and locking screw. It can also handle bearings and bushings within the range of 5 mm to 130 mm.

KTM: **20-N07**  
50 pcs 5 905694 023838

WIRING HARNESS TAPE

NEW

Universal fabric insulating tape combines essential properties such as noise damping, abrasion resistance, and strong bonding, while allowing wires to retain their flexibility, making the installation process easier.

## W4 CV JOINT BOOT CLAMPS

CLAMPS FOR MOUNTING RUBBER CV JOINT BOOTS,  
MADE OF HIGH-QUALITY CHROME-NICKEL STAINLESS STEEL 4 (AISI304)

They ensure a durable and reliable connection and exhibit very high resistance to corrosion. The clamps are available in two sizes: 25-50 mm and 40-110 mm, and are packaged in plastic bags containing 10 pieces each.

KTM	Product	Max. Assembly (Nm)*	Max. Pressure (Bars)*	Quantity pcs. per package	Quantity per box pcs.	EAN

# HOSE CLIP / STAINLESS JUBILEE CLIPS W2

## HOSE CLIP

JUBILEE CLIP IS DESIGNED FOR SETTING HOSES WITH 9 MM TAPE MADE OF STAINLESS STEEL W2 (AISI 430)

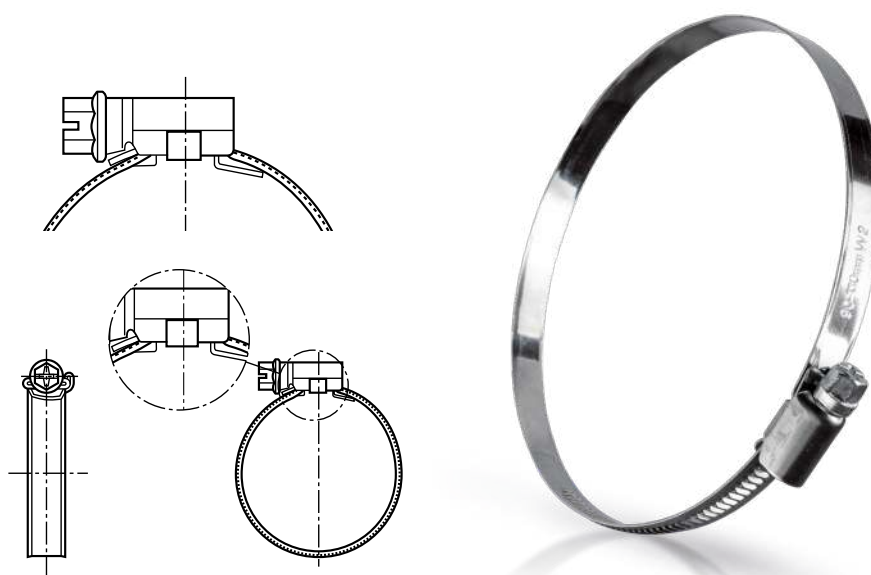

Thanks to a custom lock housing design, the MA Professional W2 clip for elastic hoses is characterized by excellent parameters, while maintaining very compact size.

The cold-formed ribbing combined with slightly elevated edges provides protection of the elastic hose against all damage. Made of corrosion-resistant AISI-430 steel (tape and lock housing), the clips are an attractive option for the automotive industry. Due to their high corrosion resistance and good plastic parameters, the rust-proof W2 hose clip is also very popular on other technical markets. The recommended mounting moment depends on the size of the clip and should be matched to the hose type and the connection geometry.

### MATERIALS USED:

- **Screw:**  
Qst 36-3 soft steel (DIN 1.0213)  
Zinc-plated, with white-silver passivation (Cr3)
- **Tape and lock:**  
X6Cr17 stainless steel (DIN 1.4016) (AISI-430)

\* The maximum application pressure can vary depending on the type of hose used and the geometry of the coupling.

## BLACK PLASTIC CLAMPS

Black mounting ties made of high-quality PA66 polyamide, resistant to UV radiation. They retain their properties in a wide temperature range, from -40°C to + 85°C. Flammability class 94V-2. A wide range of applications, e.g. strapping and bundling cables, assembly elements and many others.

Available in a variety of sizes. Packed in 50 and 100 pieces

## WHITE PLASTIC CLAMPS

White mounting ties made of high-quality PA66 polyamide, resistant to UV radiation. They retain their properties in a wide temperature range, from -40°C to + 85°C. Flammability class 94V-2. A wide range of applications, e.g. strapping and bundling cables, assembly elements and many others. Available in a variety of sizes. Packed in 50 and 100 pieces.

# technical chemistry

**TECMAXX**

The **Tecmaxx** technical product line offers a wide variety of products for both amateur and professional users. The Tecmaxx product selection includes various greases, technical vaseline, universal and technical cleaner, degreasers, compressed air, as well as stainless steel, fireplace and grill cleaning products.

[tecmaxx.pl](http://tecmaxx.pl)

**SILICONE GREASE**

Lubricant for precision elements. Resistant to high and low temperatures and water. Application: metal, plastic, rubber, wood.

KTM: **14-001**  
 Cap.: 250 ml  
 24 pcs 5 905694 015314

**WHITE GREASE**

Ensures long-lasting lubrication. A grease with high penetrating properties. Resistant to rinsing and temperature. It does not drip off vertical surfaces.

KTM: **14-002**  
 Cap.: 200 ml  
 24 pcs 5 905694 015321

**PTFE GREASE**

PTFE particles effectively adhere to metals, reduce friction and increase resistance to corrosion. Resistant to salt and water.

KTM: **14-016**  
 Cap.: 400 ml  
 24 pcs 5 905694 016526

KTM: **14-003**  
 Cap.: 200 ml  
 24 pcs 5 905694 015338

**COPPER GREASE**

It protects metal parts working at a high temperature against corrosion and thermal distortion. It reduces friction of metal parts, protects bearings, corroded nuts and screws, protects against thermal distortion in extreme conditions.

KTM: **14-004**  
 Cap.: 200 ml  
 24 pcs 5 905694 015345

**PENETRANT**

Gives quick and strong effect. It cleans and loosens seized parts. Water resistant.

KTM: **14-005**  
 Cap.: 250 ml  
 24 pcs 5 905694 015352

**TECHNICAL VASELINE**

High-quality protective agent. A lubricant for all lightly loaded mechanisms. It protects battery clamps against oxidation.

KTM: **14-007**  
 Cap.: 200 ml  
 24 pcs 5 905694 015376

**PADLOCK AND LOCK LUBRICANT**

Product for all types of locks and padlocks. Prevents from blocking. Defrosts instantly, lubricates and preserves.

KTM: **14-008**  
 Cap.: 100 ml  
 24 pcs 5 905694 015383

**MACHINE GREASE**

Strengthened grease resistant to high loads, pressure, vibrations, shaking and centrifugal forces. It has strong penetrating properties so it penetrates deeply without the need to disassemble. Intended for machine parts and moving elements.

KTM: **14-013**  
 Cap.: 250 ml  
 24 pcs 5 905694 015451

**LITHIUM GREASE LT-43**

Water resistant grease of high mechanical stability. It lubricates mechanical elements, rolling and slide bearings, etc. perfectly.

KTM: **14-015**  
 Cap.: 400 ml  
 24 pcs 5 905694 015475

**GATE GREASE WITH APPLICATOR**

Product used for lubrication, maintenance and protection against moisture and corrosion. It is suitable for all types of gates: traditional, vertical tilt, roller-shutter, sliding and leaf gates. It improves the operation of hardy operating mechanisms.

KTM: **14-022**  
 Cap.: 400 ml  
 24 pcs 5 905694 017363

**CUTTING AND DRILLING OIL**

Cutting and drilling oil is used to cool and lubricate during drilling, cutting, lathework and bending. It is suitable for working of alloyed and unalloyed steel, cast iron, chromium-nickel alloys, copper, titanium, aluminum and its alloys.

KTM: **14-030**  
 Cap.: 400 ml  
 12 pcs 5 905694 017141

**GRAPHITE GREASE**

Grease with the addition of graphite. Highly resistant to water and temperature. It protects against rust and corrosion.

KTM: **14-025**

Poj. 50 g  
12 pcs

**SILICONE GREASE**

For various types of surfaces, e.g. plastics, rubber, wood. It creates a coat of unique durability, ensures maximum reduction of friction and long operation of protected devices. Resistant to water.

KTM: **14-026**

Poj. 50 g  
12 pcs

**COPPER GREASE**

A multi-purpose agent that can be used in the most difficult conditions. Resistant to temperatures from -30°C to 1200°C. For lubrication of bolts, nuts, threaded connections and any matching surfaces, pipe fittings, etc.

KTM: **14-027**

Poj. 50 g  
12 pcs

**SYNTHETIC GREASE**

Multi-purpose grease for very difficult conditions. It is highly water resistant. For use in industries with difficult working conditions (moisture, loads, high temperature, dust, etc.).

KTM: **14-028**

Poj. 50 g  
12 pcs

**LITHIUM GREASE**

Multi-purpose grease for lubrication of elements and systems in industrial, agricultural vehicles and cars. It ensures effective lubrication even under the harshest operating conditions. Resistant to water and oxidation.

KTM: **14-029**

Poj. 50 g  
12 pcs

**CERAMIC GREASE**

A highly adhesive ceramic grease resistant to extreme loads and temperatures up to 1400°C. It excellently protects highly loaded elements exposed to weather conditions from wear. It secures metal parts against corrosion and electrolytic corrosion. It does not contain metals.

KTM: **14-054**

Cap.: 50 g  
12 pcs

NEW

**MACHINE GREASE**

Multi-purpose grease. Resistant to temperature from -10°C to +60°C and resistant to water. It forms a layer protecting against moisture, temperature and contamination. For lubrication of plain bearings and other friction surfaces - except for bearings rolling.

KTM: **14-023**

Cap.: 500 ml  
12 pcs

**BEARING LUBRICANT**

Lubricant for rolling and slide bearings, other friction surfaces operating under normal conditions, in the temperature range from -30°C to +130°C. Water resistant.

KTM: **14-024**

Cap.: 500 ml  
12 pcs

**THREADLOCKER BLUE  
- MEDIUM STRENGTH**

Thread-locking fluid, medium force. Prevents loosening of joints. Seals joints. Prevents corrosion.

KTM: **14-033**  
Cap.: 6 ml  
12 pcs 5 905694 017745

KTM: **14-035**  
Cap.: 10 ml  
12 pcs 5 905694 019251

**THREADLOCKER RED  
- HIGH STRENGTH**

Thread-locking fluid, strong force. Prevents loosening of joints. Seals joints. Prevents corrosion. Withstands high loads.

KTM: **14-034**  
Cap.: 6 ml  
12 pcs 5 905694 017738

KTM: **14-036**  
Cap.: 10 ml  
12 pcs 5 905694 019268

**RUST REMOVER MoS<sub>2</sub>**

**NEW**

A solution for removing oxides from metal surfaces. It facilitates the loosening of rusted bolts, nuts, and spark plugs. The high-quality oil and MoS<sub>2</sub> additive ensure that the metal surface is lubricated and permanently protected. It safeguards metal from weather conditions and corrosion.

KTM: **14-051**  
Cap.: 400 ml  
24 pcs 5 905694 024064

**RUST REMOVER MoS<sub>2</sub>  
APPLICATOR**

**NEW**

A solution for removing oxides from metal surfaces. It facilitates the loosening of rusted bolts, nuts, and spark plugs. The high-quality oil and MoS<sub>2</sub> additive ensure that the metal surface is lubricated and permanently protected. It safeguards metal from weather conditions and corrosion.

KTM: **14-052**  
Cap.: 500 ml  
24 pcs 5 905694 024071

**CERAMIC LUBRICANT**

**NEW**

Ceramic grease for bolts and connections exposed to high pressure and temperatures up to 1400°C. It prevents the seizing of bolts and metal connections made of steel, noble alloys, copper, and aluminum in industrial applications.

KTM: **14-053**  
Cap.: 400 ml  
24 pcs 5 905694 024088

**COMPRESSOR OIL**

**NEW**

High-quality oil L-DAH 100 is designed for the lubrication of single and multi-stage air compressors, including reciprocating, rotary, and rotary vane compressors, where the oil temperature in the compression phase does not exceed 150 degrees. This oil is dedicated to equipment operating under medium conditions. It features low foaming and good air release. The product provides excellent anti-corrosion and anti-wear properties and is highly resistant to oxidation and coking.

KTM: **14-058**  
Cap.: 11  
12 pcs 5 905694 024279

DEGREASER

Agent removing greasy dirt. It dissolves old greasy sediments such as oils and lubricants, removes dirt layers perfectly.

KTM: **14-009**  
 Poj. 1 L  
 12 pcs  
 5 905694 015390

ALUMINUM CLEANER

Product intended for cleaning and degreasing surfaces made of aluminum and its alloys. It can also be used to clean surfaces made of other metals.

KTM: **14-019**  
 Cap.: 1 L  
 12 pcs  
 5 905694 016977

ENGINE CLEANER

Very strong and effective product intended for washing engines and car components. It removes oils and lubricants from the cleaned surfaces and other persistent dirt perfectly and quickly.

KTM: **14-020**  
 Cap.: 1 L  
 12 pcs  
 5 905694 016984

NEUTRAL CLEANER

Universal washing and cleaning agent. Degreases and washes tools, garden equipment, car parts and elements made of plastic.

KTM: **14-021**  
 Cap.: 1 L  
 12 pcs  
 5 905694 016991

TECHNICAL CLEANER

Washing and cleaning agent for dirt in garage, workshop and other spaces. It removes burnt oil, carbon deposits, grease and other stubborn dirt.

KTM: **14-010**  
 Cap.: 650 ml  
 12 pcs  
 5 905694 015406

GRILL CLEANER

Agent with a very strong effect. Removes burnt-in fat and smoke. Dissolves and removes burnt-on food.

KTM: **14-011**  
 Cap.: 650 ml  
 12 pcs  
 5 905694 015413

FIREPLACE CLEANING FOAM

Foam for windows and fireplace inserts. Removes smoke, burnt wood deposits, soot, tar compounds and burnt-on fat perfectly.

KTM: **14-012**  
 Cap.: 650 ml  
 12 pcs  
 5 905694 015420

**STAINLESS STEEL  
CLEANER**

An easy-to-use agent intended for cleaning surfaces and elements made of stainless steel and aluminum. It degreases perfectly. It prepares surfaces for further work.

KTM: **14-017**  
Cap.: 650 ml  
12 pcs 5 905694 016533

**APC OUT  
PREPARATION FOR CLEANING ROOFS AND FACADES**

Highly foaming, alkaline cleaning fluid for cleaning roofs, facades, paving stones. Removes atmospheric dirt, dirt of organic origin (plants, insects), stains. Fluid is a concentrate suitable for manual washing, washing with the use of pressure and foam-generating devices.

KTM: **14-044**  
Cap.: 1 l  
12 pcs 5 905694 023050

KTM: **14-045**  
Cap.: 5 l  
1 pcs 5 905694 023067

**MECH OUT  
PREPARATION FOR REMOVING MOSS AND LICHENS**

A cleaning product for surfaces contaminated with moss, lichens, and fungi. It is excellent for cleaning roofs and facades. Effectively removes dirt, mold, and lichens from all types of surfaces, including wood, masonry, concrete, tiles, and facades.

KTM: **14-046**  
Cap.: 1 l  
12 pcs 5 905694 023234

KTM: **14-047**  
Cap.: 5 l  
1 pcs 5 905694 023241

**ACTIVE FOAM**

Foaming preparation, contoured and softens dirt. It has a neutral PH - can be used on different types of surfaces. Thanks to its unique formula, it is characterized by high efficiency. Perfectly removes dirt, dust and other grime. Can be used for washing cars.

KTM: **14-048**  
Cap.: 1 kg  
6 pcs 5 905694 023937

KTM: **14-049**  
Cap.: 5 kg  
1 pcs 5 905694 023944

**BRAKE CLEANER  
PREPARATION  
FOR CLEANING BRAKE DISCS**

**NEW**

A product for cleaning brake discs. A quick-drying agent for degreasing brake discs, clutch components, and other metal parts. It effectively and rapidly removes contaminants from metal surfaces.

KTM: **14-056**  
Cap.: 500 ml  
30 pcs

**TECHNICAL POWER CLEANER**

**NEW**

A strong, intensive degreaser with the addition of acetone intended for quick removal of protective maintenance and heavy dirt from wax, rubber, silicone, oil, grease, glue, resins, paints, etc. Perfect for washing and degreasing machine parts before service and assembly and varnishing. Perfectly dissolves difficult contaminants and leaves the surface perfectly degreased.

KTM: **14-060**  
Cap.: 600 ml  
12 pcs

**SEAT BELT SPRAY**

**NEW**

Preparation for regenerating seat belts. Supports their operation. After use, it restores smooth rolling and unwinding of the belts. Eliminates the problem of rolling and unwinding without the need for mechanical repair. Leaves a pleasant citrus scent. Leaves no marks on clothing.

KTM: **14-062**  
Cap.: 250 ml  
24 pcs

**EPOXY METAL 5 MINUTES  
- SYRINGE**

**NEW**

Tecmax Epoxy Metal 5 min is a fast-curing epoxy-steel compound designed for repairing damaged or cracked items made from various metal alloys, wood, ceramics, plastics, and many other materials. The product forms a very hard bond resistant to temperatures up to 150°C and is also resistant to automotive, transmission, and hydraulic oils, gasoline, water, and many other substances.

KTM: **14-057**  
Cap.: 25 ml  
12 pcs

**EPOXY CLEAR  
5 MINUT - SYRINGE**

**NEW**

A fast-drying transparent epoxy adhesive designed for repairing damaged or cracked items made from various hard materials such as steel, plastic, wood, ceramics, glass, and many others. It forms a very hard bond that is resistant to weather conditions and temperatures up to 80°C.

KTM: **14-059**  
Cap.: 25 ml  
12 pcs

**SUPER METAL EXTREME  
70% STALI 10 MIN.**

**NEW**

A top-quality epoxy-steel repair compound containing 70% steel, designed for quick and durable repair of damaged metal components. It quickly hardens to form a very tough bond resistant to weather conditions, chemicals, and temperatures ranging from -60°C to 120°C. Once fully cured, the bond can be mechanically processed or painted. The compound has exceptional properties for filling material gaps.

KTM: **14-061**  
Cap.: 25 ml  
12 pcs

# BONDINI

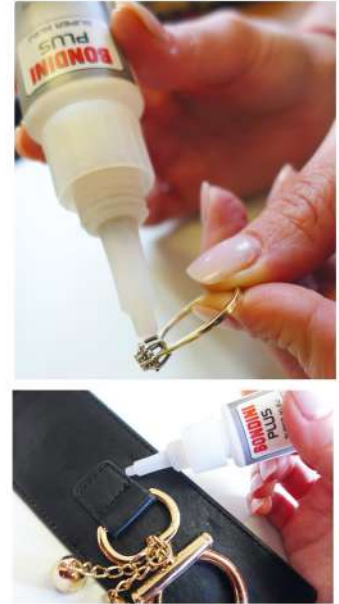

## cyanoacrylate adhesives

Cyanoacrylate adhesives, more commonly known as instant or super glues, are excellent solutions for various bonding and repair tasks. **BONDINI PLUS** and **BONDINI BLACK** are high-quality adhesives that bond many different materials in just a few seconds. They are perfect for both household and industrial applications. The short bonding time combined with high bond strength makes these adhesives ideal tools for demanding users. The glue never hardens in the applicator because it features a unique cap with a special needle inside that seals the glue nozzle. When the cap is unscrewed, the needle unblocks the nozzle, ensuring the glue is always ready for use.

**BONDINI BLACK**  
BLACK CYANOACRYLATE ADHESIVE

**BONDINI PLUS**  
CYANOACRYLATE ADHESIVE

Bonds permanently in 10 seconds. Super strong. Waterproof. Flexible. Always ready to use. It features a unique dispenser and a cap with a needle that prevents clogging. The black color makes it ideal for bonding rubber, leather, plastic components, metal, and more.

Bonds permanently in 10 seconds. Super strong. Always ready to use. Features a unique dispenser and a cap with a needle that prevents clogging.

Adheres to:

- wood
- glass
- ceramics
- metal
- leather
- rubber
- fabrics

### NEUTRAL ACTIVE FOAM NEUTRAL ACTIVE FOAM FOR VEHICLE WASHING

Concentrated active foam with neutral pH for safe and effective car body washing. Thanks to the use of modern technology, it is safe for vehicles coated with various types of waxes, quartz, and ceramic coatings. The product has a pleasant scent and high foaming properties, and it rinses off easily.

### INSEKT LIQUID FOR INSECTS REMOVAL

A preparation for removing insects and organic contaminants (tree sap, bird droppings, etc.) from bodies, windows, headlights, bumpers. It leaves no streaks after rinsing.

KTM: **40-021**  
Cap.: 5 L  
1 pc

5 905694 002208

### SHAMPOO WAX CAR SHAMPOO WITH WAX

Shampoo with added natural wax designed for washing both personal and commercial vehicles. Its specific composition protects the car's paintwork from the negative effects of atmospheric and road factors. It effectively removes strong dirt, has a preservative effect, and adds shine. It allows for simultaneous car washing and waxing.

KTM: **40-032**  
Cap.: 5 L  
1 pc

5 905694 002314

### SHAMPOO BLUE CAR SHAMPOO - CONCENTRATE

Shampoo designed for washing both personal and commercial vehicles. It effectively dissolves and removes road contaminants and other stubborn dirt, while protecting the cleaned surfaces from becoming dull. After rinsing, it does not leave streaks.

KTM: **40-089**  
Cap.: 20 L  
1 pc

5 905694 002673

### ACTIVE TRUCK NF FOAMING PREPARATION FOR PRELIMINARY AND TOUCHLESS CLEANING

A concentrated and highly foaming preparation for cleaning the bodies of mechanical vehicles. Thanks to a unique formula, it is characterized by high efficiency. It perfectly removes dirt, dust, and other contaminants. Avoid using the product on heated surfaces.

5 905694 011897

## WAXING PREPARATIONS

### WAXCAR WET DRYING WAX

A cationic hydro wax that provides painted surfaces with long-lasting hydrophobic action, shine, and conservation. Thanks to modern technology, the product has excellent properties for softening even very hard water, which enables its faster and even more effective action. The antistatic substances used in the preparation effectively protect the paint from the effects of external factors. It does not leave streaks and stains on the surface.

KTM: **40-064**  
Cap.: 5 L  
1 pc  
5 905694 002628

### POLIWAXCAR POLYMER WAX FOR BODY CONSERVATION

A concentrated, cationic hydro wax that provides painted surfaces with long-lasting hydrophobic action, high gloss, and conservation. Thanks to the content of polymers and antistatic substances, it effectively protects the paint from the effects of external factors. It does not leave streaks and stains on the surface. Applied after active foam, it facilitates its rinsing and speeds up the vehicle drying time.

KTM: **40-065**  
Cap.: 5 L  
1 pc  
5 905694 015086

### QUICK SHINE QUICK GLOSS WAX

A rapid polishing wax that protects the paint from dust settling, provides an instant shine and paint protection. It enhances the natural colour of the paint and protects it from UV radiation. It can be applied to any external surfaces of the vehicle, such as windows, plastics or rubber elements.

KTM: **40-105**  
Cap.: 5 L  
6 pcs  
5 905694 013341

## PREPARATIONS FOR ENGINES AND RIMS

### ENGINE LIQUID FOR THE ENGINE AND CAR COMPONENTS

A preparation for cleaning the engine and other car components. Thanks to the content of organic solvents, it removes even the most difficult dirt to remove caused by oil or other petroleum products. Avoid using the product on heated surfaces. Do not use on painted parts.

KTM: **40-044**  
Cap.: 650 ml  
1 pc  
5 905694 002437

### ALUM ALUMINUM CLEANING PREPARATION - ACIDIC

A slightly foaming preparation for cleaning aluminum elements such as rims, sides, radiators, etc. It perfectly removes dirt, brake pad deposits, water deposits, and contaminants from the settling of iron oxides.

KTM: **40-017**  
Cap.: 5 L  
1 pc  
5 905694 002161

## TYRES & RIMS

### TYRE SHINE PREPARATION FOR POLISHING TIRES AND CONSERVING THEM

A silicone-based preparation for the conservation and polishing of elements made of rubber. Thanks to its unique formula, it is quickly absorbed into the rubber surface, making it flexible and preventing its chapping (peeling and discoloration). It gives a wet tire effect, and protects seals from freezing. It can also be used for the conservation of external plastic car finish elements.

KTM: **40-073**  
Cap.: 5 L  
1 pc  
5 905694 002741

### PLASTICAR UNIVERSAL CLEANING AGENT

A cleaning and maintenance preparation for car dashboards and other surfaces made of plastic, both inside and outside the vehicle. It leaves a satin shine on the cleaned surfaces, protecting them from UV action. The preparation does not discolour the cleaned surfaces, and thanks to its antistatic action, it prevents dust from settling.

KTM: **40-060**  
Cap.: 5 L  
1 pc 5 905694 002581

### BIO KOKPIT FRESH / LEMON PREPARATION FOR PLASTIC RENOVATION

Dashboard care milk. It cleans and maintains plastic elements inside the car. It gives a shine to unpainted bumpers, spoilers, and rubber. It does not grease, acts antistatically and makes dust settling difficult.

Bio Cockpit Fresh  
KTM: **40-067**

1 pc 5 907513 270843

Bio Cockpit Lemon  
KTM: **40-068**  
Cap.: 5 L  
1 pc 5 907513 270836

### KOKPIT WAX PREPARATION FOR CLEANING AND MAINTAINING DASHBOARDS

A cleaning and maintenance preparation for car dashboards and other surfaces made of plastic, both inside and outside the vehicle. It leaves a satin shine on the cleaned surfaces, protecting them from UV action. The preparation does not discolour the cleaned surfaces, and thanks to its antistatic action, it prevents dust from settling.

KTM: **40-108**  
Cap.: 1 L  
6 pcs 5 905694 013242

### TEXTICAR LIQUID FOR CAR'S UPHOLSTERY EXTRACTIVE CLEANING

A highly concentrated product that effectively and quickly removes stains from car upholstery and all types of fabrics. It provides an excellent cleaning effect, removes dirt and stains from the deeper layers of the fabric. It has cleaning and degreasing properties and prevents the re-deposition of dirt. It nourishes and revives colours. It works well even in cold and hard water.

KTM: **40-107**  
Cap.: 5 L  
1 pc 5 905694 013174

### LEATHER CLEANER LEATHER SURFACE CLEANER

A product for cleaning leather surfaces. Safe for the surface, it effectively removes dirt from micro-cracks without drying out the leather. It prepares the surface for the application of a care product.

KTM: **40-103**  
Cap.: 1 L  
6 pcs 5 905694 013358

### LEATHER CONDITIONER NOURISHING EMULSION FOR LEATHER SURFACES

A care and conservation product for leather and leather-like surfaces. It contains avocado oil, providing long-lasting protection for the leather. The product restores the elasticity of the leather and reduces the aging effect, extending its lifespan, moisturizing, and regenerating. Leather treated with the product does not dry out, fade, wear out, or crack, it regains its natural shine and softness.

KTM: **40-104**  
Cap.: 1 L  
6 pcs 5 905694 013440

**ACCESSORIES FOR CAR WASHES**

**SPRAYER 6L**  
Xi6 INDUSTRIAL SPRAYER

A manual sprayer for applying water-diluted preparations in a special chemically-resistant version. Particularly recommended for applying pre-wash preparations (active foams), wheel cleaning products, as well as for applying drying waxes.

KTM:	<b>40-069</b>	
Cap.:	6 L	
	1 pc	5 904447 009389

**CHAMOIS**  
EXPERT+ SYNTHETIC CHAMOIS

A very durable chamois with high water-absorbing properties, it does not leave streaks on paint and glass. Size 53 x 43 cm

KTM:	<b>40-070</b>	
Size:	53 x 43 cm	
	1 pc	5 905694 002697

**SPRAYER 1L**  
MERCURY PRO+ 1 LITRE SPRAYER  
CHEMICAL-RESISTANT

Hand sprayer for applying water-dilutable preparations in a special chemical-resistant version. Especially recommended for applying products for window cleaning, upholstery cleaning, plastic cleaning, as well as for applying drying waxes.

KTM:	<b>40-079</b>	
Cap.:	1 L	
	1 pc	5 904447 001499

**SPRAYER 1,5L**  
VENUS PRO+ 1.5 LITRE SPRAYER  
CHEMICAL-RESISTANT

Hand sprayer for applying water-dilutable preparations in a special chemical-resistant version. Especially recommended for applying pre-wash products (active foams), wheel cleaning products, as well as for applying drying waxes.

KTM:	<b>40-080</b>	
Cap.:	1,5 kg	
	1 pc	5 904447 001475
